

eFileIllinois.gov Integration Report

Definitions	
Manual Download	The court's historic records are not searchable via eFileILgov. Court users manually download filing data from eFileILgov and then manually record that information in their record keeping system(s).
One-Way	The court's historic records are not searchable via eFileILgov. eFileILgov sends an electronic file containing filing data to the court's electronic record keeping system(s) and data entry into said systems is performed electronically.
Two-Way	The court's historic records are searchable via eFileILgov. eFileILgov sends an electronic file containing filing data to the court's electronic record keeping system(s) and data entry into said systems is performed electronically.
Repository Model	The case information provided in re:SearchIL from courts operating in the repository model is an accurate representation of cases and documents filed and accepted through eFileIL to each Illinois court. Documents entered into the case record (i.e., court orders or other filings), which are accepted outside of eFileIL, may be manually uploaded into re:SearchIL by the clerk.
Integrated Model	The case information provided on re:SearchIL from courts operating using an integrated model is an accurate representation of cases and documents filed and accepted through eFileIL or added to a case record in each court. The real-time integration with a court's case management system (CMS) allows changes made in the CMS to be automatically reflected in re:SearchIL. These changes not only include additions to a court record, case and document security which protects sensitive information, but may include non e-filed documents such as court orders.

Summary		
eFile Integration Type	Court	Count
Manual Download	Circuit Court	26
		26
One-Way	Circuit Court	2
		2
Two-Way	Appellate	5
	Circuit Court	73
	Supreme Court	1
		79
Total		107

ReSearch Integration Type	Court	Count
Integrated	Circuit Court	50
		50
Repository	Appellate	5
	Circuit Court	51
	Supreme Court	1
		57
Total		107
